

Risk, AI & Quant Finance

Industry Trends in Risk Management: from data-driven decisions to career pathways in quantitative finance

A Phase 2 guest lecture for the Gifted Education Fund Off-School Advanced Learning Programme “Nurturing Future Risk Managers and Actuaries: An AI-powered Journey for Gifted Secondary Students”.

Mr Dominic Leung

Quantitative Developer, AM Squared Limited · CUHK Alumnus

MPhil in Risk Management Science, CUHK

BSc in Quantitative Finance and Risk Management Science, CUHK

Former Associate, Goldman Sachs

Experience in trading strategies and portfolio risk analytics

DL

Dominic Leung is a CUHK-trained quantitative finance and risk-science practitioner who connects mathematical modelling, programming, and practical market decision-making. He currently works as a **Quantitative Developer at AM Squared Limited**, building analytical workflows for trading and risk applications.

Before joining AM Squared Limited, Dominic worked as an **Associate at Goldman Sachs** and gained early exposure through internships involving trading strategies, portfolio risk analytics, and corporate applications.

As part of **OSALP Phase 2: Introduction to Risk Management Science**, this lecture helps students connect probability, statistics, finance, AI-enhanced simulations, and risk thinking with modern quantitative finance.

The Chinese University of
Hong Kong

What students will learn

How mathematical thinking, data analytics, coding, and AI tools support real decisions in trading, portfolio risk, and quantitative finance.

Why this Phase 2 lecture matters

It brings industry perspective into students’ risk-management journey, linking OSALP learning to university preparation, internships, and career pathways.

Nurturing Future Risk Managers and Actuaries

Gifted Education Fund OSALP 2025-04 · An AI-powered journey for gifted S2–S3 students in mathematics, statistics, finance, risk management, and actuarial thinking.

- AI-enhanced simulations and data-driven decision-making
- From CUHK studies to internships and professional growth
- Practical advice for young learners curious about finance, technology, and risk
